

Bure™ Double StandTall Walker

Bure™ Double StandTall Walker

Bure Double is Gate's most advanced, flexible StandTall Walker. It is equipped with twin electric drives for raising and lowering the table and widening the walking frame. **Bure Double** provides excellent assistance for helping patients stand up. Personnel burdens, and in turn repetitive strain injuries, are minimised. Some patients can even get up on their own with the assistance of this StandTall Walker. With the frame arms in the inner position the StandTall Walker is narrow, easy to manoeuvre and able to negotiate most doorways.

Sustainable

The StandTall Walker has an extra reinforcement band around the armrest cushions to prevent splitting from side impacts.

Easily reachable hand control

The hand controls are located so that both of the carer's and user's hands can easily reach them.

Flexible stepless adjustment

Electrically driven height adjustment makes it easy to pre-set the StandTall Walker to the desired height. Once the patient is standing in position the height can be steplessly adjusted for best comfort and optimal walking support.

Power Rise

Bure Double provides excellent assistance for helping patients stand up. Personnel burdens, and thus repetitive strain injuries, are minimized. Some patients can even get up on their own with the assistance of the StandTall Walker.

Brakes and directional locks

There are optional one or two handed brakes that can be positioned so that the user can reach them from the walking position. The handbrake acts on the rear castors and the brake assembly also includes directional locks that make it easier for the user to stay on course when walking.

Eminently suitable at home

Because Bure Double is so flexible it is eminently suitable for the home environment. With the frame arms in the inner position the StandTall Walker is narrow, easy to manoeuvre and able to negotiate most doorways.

Water proofing

All Bure Double electrical components have IP 65 international protection ratings and can occasionally be used in damp areas.

Ergonomic handles

The ergonomically designed handles are steplessly adjustable in every direction for optimum individual adaptation. This is extremely important for stroke patients who can thus reach their "usual" hand position.

Lowest height

Bure Double can be lowered to 88 cm and as such is the lowest of all GATE StandTall Walkers.

Stable

The StandTall Walker has anatomical cushions that provide relief for shoulders, arms and the neck and shift the focus to larger muscle groups such as leg and chest muscles instead. This improves stability and makes the walker easier to steer.

Open design

The open design provides the same stability but with greater room for manoeuvre. The patient does not feel shut in and it makes assistance with standing up and dressing easier.

Lockable castors

All four castors are individually lockable as standard on Bure Double.

Electrically driven frame widening

Electrically driven frame widening makes it easy to move StandTall Walkers right up close to users without worrying about wheelchairs, beds or chair legs. This also helps personnel assist patients to stand up. With the frame in its outer position the StandTall Walker is extra stable and can be used to best advantage by the patient, which helps those who need extra walking space.

Technical specifications

Dimensions apply to walkers with 125mm castors

CE tested and approved according to SS-EN 12182:1999

Product Code	Product	Width	Max user weight	Length	Height	Armrests/internal dimension
RHGA-56-313	Bure Double - Electric	65-90cm	130kg	81cm	88-128cm	30-48cm

Accessories

Brake Kit Twin

Adds a hand brake so that the user is able to halt movement during walking exercises.

RHGA-56-354-0

Platform - Steel

A flexible alternative when moving a patient a short distance.

RHGA-56-325

Platform - Aluminium

A flexible alternative when moving a patient a short distance.

RHGA-56-325-1

Drip Stand with Attachment

Creates great ability for a patient to move freely in a room, on the ward or at home.

RHGA-56-338

Oxygen Bracket

Means that a patient is no longer confined to the bed.

RHGA-56-336

Side Support

Prevents arms from sliding from armrest cushions and stabilise walking.

RHGA-56-337

Soft Basket

Basket with attachment has enough room for all the important stuff.

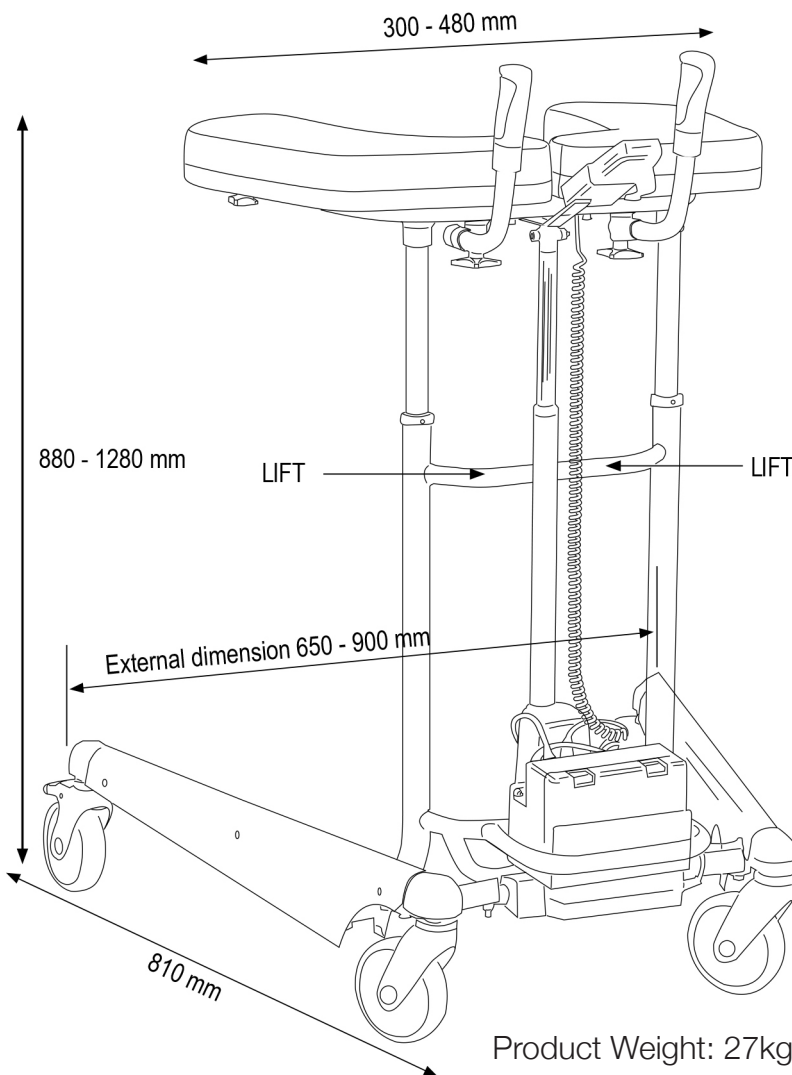

RHGA-56-389

Height Adapter for Double

Provides extra support for tall users and raises the armrest surface by 70 mm.

RHGA-56-329

Castors with brake (various sizes)

Improved general condition

Apart from being an excellent aid for getting patients up and about, the Stand-Tall Walker is also a valuable rehabilitation tool. Rehabilitation using the StandTall Walker keeps the patient's muscles and alimentary canal active and contributes to improving the general condition of the otherwise bedridden.

Proper support makes it easier for infirm patients or those with weak legs to walk, and some can even manage without the support of healthcare personnel.

Improved work ergonomics

The Bure StandTall Walker creates opportunities for much better work ergonomics for carers, trainers and anyone working with patients. For example, the open design provides increased manoeuvring space and makes access easier when getting up or dressing. The Bure StandTall Walker contributes to reduced workloads and is an investment in personnel health.

Enhanced stability

Bure has anatomically designed cushions at a slight incline that help shoulders and arms to relax. The Stand-Tall Walker's design helps to shift the focus from muscles in the hands, arms and shoulders to larger muscle groups such as leg and chest muscles. Stability is improved and the walker is easier to steer at the same time as trunk bending is cushioned and posture improved.

Other Walkers in the Bure™ StandTall range

Bure™
Standard/S
StandTall Walker

Bure Standard and **S** is available in three versions; ELECTRIC, GAS and MANUAL. **Bure S** is a support walker and a narrower version of the **Bure Standard** specially adapted to work in confined spaces and to perform flexibly in every situation.

Bure™
Ortho StandTall Walker

Bure Ortho is especially designed for orthopaedics departments and situations that demand extra legroom and room for manoeuvre for the user. **Bure Ortho** has a powerful electric motor for powered height adjustment.

Bure™
XL StandTall Walker

Bure XL was designed for the bigger, heavier patient and therefore provides extra space and strength. Since extra powerful aids are required in the care and nursing of heavier patients, **Bure XL** is always supplied with electric drives.

Also Available

Bure™
Rise & Go™

Bure Rise & Go is an all-round solution that saves space, time and money. Instead of purchasing both hoists and walkers it is probably often sufficient to acquire the flexible, cost effective **Bure Rise & Go**.

Amfibi™
Hygiene Chairs

GATE hygiene chairs are available in three different versions. **Amfibi Double** is the most advanced, versatile hygiene chair; it is adjustable in height and tilt angle of inclination. **Amfibi XL** was designed for the bigger, heavier patient, while **Basic** is the simplest version.
