Year
Warranty

Adjust your sleeping style for better health

In this position your body isn't supported creating pressure points which can result in poor

Raising the head slightly allows you to have full support through to your lower back.

By raising the leg section to a similar height it relieves the pressure from the base of the

Raise the legs more to relieve symptoms of fluid retention, aching legs and poor

Get further relief from ailments by raising the back to a higher position.

To make getting out of the bed easier, lower the leg section and raise the head section.

Unlike ordinary flat beds,

ADJUSTABLE BEDS support the

natural curves of your body without causing muscle strain or discomfort.

Liberty Healthcare ADJUSTABLE BEDS are professionally designed to give you the ultimate comfort, rest, relief and support at home.

Better Sleep = Better Health = Better Life
